

# SUPER HANG ON REFUGIUM

- **Expand your tank**
- **Exclude NO3 & PO4**
- **Energy saving, PL light apply**

## DESCRIPTION

The reef octopus super hong on refugium is designed as an extension for your aquazrium. At the same time, it is keeping separate from the rest of your aquarium, to provide a suitable envirement for you to keep live food items, macro algae,damaged or newly propagated corals and reduce the risk of losing these items as interspecific competition or other conditions in the main tank.

The refugium is also an additional filtration system. The plants you kepted in it will help to absorb the harmful NO3 & PO4 and inhibit the growth of harmful algae in the main tank.

It will help you keep the stable of pH in your tank. When you set the light on refugium works as contrary with the main light, the plants in your refugium could consuming and processing CO2, thereby reducing common "nighttime" pH fluctuations.

Beside all these benefits, the refugium have add much water in the aquarium system, making it easier to keep water parameters stable.

## ASSEMBLE

- 1.Open the package and carefully inspect all the parts.
- 2.Assemble the may body of the refugium as the assemble drawings
- 3.Assebble the light as it's user's manual.
- 4.Hang the refugium on the pasiton where you choose, fixing it well, put the light on the refugium.
